Even the simplest element of street furniture deserves to have an interesting detail. A softly shaped head, distinctly inspired by the world of animals is not only mere decoration; its top inclined surface makes putting away of any objects impossible. Play of light thanks to which the column has different character from each view becomes apparent especially when columns are installed in a row. Careful fabrication of an aluminium casting stuck in a steel galvanized tube completes perfect impression from the whole unit.

The steel galvanized tube provided with a sprayed layer of powder baking paint or let in natural condition of galvanized surface. Column head made of aluminium alloy let in natural condition or provided with a sprayed layer of powder baking. The structure allows column head and body design in different colours. Anchoring under paving.
